
COPPERHEAD

Model 613

Ease of Assembly:

1. Remove the fogging unit and flex hose assembly from the shipping container.
2. Attach the liquid flow tubing together using the supplied coupling.
3. Slide the hose cuff over the adapter on the front housing. Insert the supplied 3 inch screw and locknut through the cuff and adapter and tighten securely.

Ease of Operation:

1. Loosen the tank clamps and remove the fogging head from the tank. Rest the fogging head with the flex hose onto the side of the unit.
2. Fill the tank with liquid to be fogger.
3. Insure the switch is in the OFF position. Plug the unit into the grounded 110-volt outlet.
4. Turn the unit to the ON position and regulate the cold mist fog to the desired output.
5. After completion of fogging spray a 5% solution of water and common dish washing detergent to insure the unit is clean.

Cautions:

After fogging, the adjustment valve on the unit must be turned to the off position to avoid possible siphoning of material

The Copperhead Fogger should only be used with approved chemicals. Always follow chemical manufacturer's recommendations.
