**Model 613**  
**Full Five-Year Warranty**

## Locations

*Homes  
Hotels  
Factories  
Vehicles  
Apartments  
Refuse Sites  
Barns  
Stores*

Chemical Fogging or Humidity Misting is simple with the Copperhead Fogger. The combination of the Flexible Host, Tornado Action Nozzle, and Adjustable Valve allows you to maximize cold mist fogging. This unit may be used with both oil base and water base materials - either indoors or outdoors.

## Features:

- Superior Quality Flex Hose
- Rust Proof and Rugged
- Adjustment Valve to Meter Output
- 110v or 220v Heavy Duty Motor

## Cautions:

---

After fogging, the adjustment valve on the unit must be turned to the off position to avoid possible siphoning of material

The Copperhead Fogger should only be used with approved chemicals. Always follow chemical manufacturer's recommendations.
